

USER MANUAL

UVClean Wand Sanitizer™ 4W Model: PP14A

Please read instructions carefully before using and keep instructions for reference before each use.

UVClean Wand Sanitizer™ uses ultraviolet light to disinfect the surfaces of objects from COVID-19, MERS, SARS, and other life-threatening viruses. Recommended by US Center for Disease Control (CDC) as highly effective, UVC is proven to render microorganisms dead.

Hover the wand 1/2 inch above target objects for approximately 10 seconds to destroy 99.9% of viruses and pathogens.

Use UVClean Wand Sanitizer™ to decontaminate shoes, baby toys, gym lockers, books, office supplies, doorknobs, toilet covers, cash registers, restaurant tables, computers, cellphones, and face masks. Effective on plastics, wood, metals, fabric, and other materials.

Sanitation Guide

- Hold the Handheld UVC Sanitation Wand approximately 1/2 inch from the surface or item to be sanitized.
- Gradually move the wand over the surface of the item.
- Expose each surface of the item for approximately 10 seconds.

Operating the Handheld UVClean™ Wand

- Open the battery cover. Insert 4 AA Alkaline batteries (Not Included) into the battery compartment and close the cover. (Fig. 1) Make sure the Handheld Wand UVC bulb is face down. Press the Power button once (Fig 2). The LED indicator light will turn on and the UV lamp will be lit up and ready to begin the sterilization process.
- Start surface cleaning. With the Sterilization Wand on and face down, hover over the surface to be sterilized.
- After sterilization is complete, turn the Power button to “Off” (Fig 3).
- NEVER turn the wand with the lamp facing toward you during operation. (Fig 4.)
- Do not use the UVC sterilizer on any part of human body and do not look at the UVC bulb while the Wand is in operation.

Product Specifications

Model:	PP14A
Wattage:	4W
Dimensions:	10.43×1.61×1.50“, 26.5x41x38mm
Weight:	.44 lb, .2 kg
Color:	White
Product Material:	ABS Material
Bulb Lifespan:	30,000 hours
Power Supply:	Alkaline battery (4 xAA)
UV wavelength:	254nm
Sterilizing Area:	Direct
Way to Control:	On/Off button with auto shutdown function

Disclaimers: Germicidal ultraviolet lamps pose imminent danger if used without taking the proper precautions. Avoid exposure to direct or reflected germicidal ultraviolet rays since they cause painful eye irritation and reddening of the skin. Under no circumstances should any direct germicidal UV-C unit be permitted to operate with humans, plants, or animals present in the operation area.

Warranty: Product is covered under a 6-month replacement warranty against manufacturing defects. Warranty is null and void if the product is damaged physically by the consumer; the product is repaired, maintained, modified, and disassembled.
